

BD12/15SPL-V4  
SPL SUBWOOFERS

Powerful • Uncompromising • Deep

Our latest BD subwoofers have built on the success of our previous competition subwoofers. With all new revised soft parts, basket design with a new cone and dust-cap to finish off. With 3000 and 5000 watt RMS models both with two dual voice coil configurations. There is something for everyone.

The new subwoofers are built for competition and are able to deliver unmatched output for long periods of time with ease. Offering increased excursion and power handling these BD subwoofers are not for the feint off heart, Compromising was not an option. Once against our engineers have created our biggest baddest line of subwoofers we have ever produced Set to take competitions by storm.

Model	BD12D1SPL-V4	BD12D2SPL-V4	BD15D1SPL-V4	BD15D2SPL-V4
Type	Subwoofer	Subwoofer	Subwoofer	Subwoofer
Speaker Size	12" (305mm)	12" (305mm)	15" (381mm)	15" (381mm)
Peak/RMS	3000W/9000W	3000W/9000W	3000W/9000W	3000W/9000W
Sensitivity	88dB	88dB	89dB	89dB
Fq. Response	15Hz - 850kHz	15Hz - 850kHz	15Hz - 850kHz	15Hz - 850kHz
Impedance	Dual 1Ω	Dual 2Ω	Dual 1Ω	Dual 2Ω
Mount. Depth	9" (229mm)	9" (229mm)	10.1" (258mm)	10.1" (258mm)
Mount. Dia	11" (281mm)	11" (281mm)	14.7" (357mm)	14.7" (357mm)
Enclosure Vol.	2.5 - 4.5 cuft <sup>3</sup>	2.5 - 4.5 cuft <sup>3</sup>	3 - 5 cuft <sup>3</sup>	3 - 5 cuft <sup>3</sup>

**BEST SOUND** - Huge excursion from the carefully designed soft parts allows these subwoofers to push huge amounts of air for powerful deep bass.

**PREMIUM DESIGN** - All brand new basket, gasket design and dust-cap with carefully designed for increased rigidity, while maintaining an aggressive but refined look.

**BEST POWER HANDLING** - With a powerful triple stacked pole vented motor design, and 3" high temperature 4 layer, and 4" 8 layer aluminium long wound dual voice coil for extreme power handling.

**PREMIUM PARTS** - Quad NOMEX spiders and ultra wide foam surround deliver durability and minimal distortion under extreme SPL competitions.

PAPER COMPOSITE

Light weight and strong the paper cone allows the driver to be highly efficient , and perform well under extreme SPL applications.

FOAM

High density heat pressed foam with ultra wide roll surround to give an accurate and precise bass response while aiding high excursion.

TORSION BASKET

Brand new designed angular torsion basket supports the huge motor system and the moving parts of the speaker.

FEMM MOTOR

Extreme FEMM (Finite Element Method Magnetics) designed motor delivers high motor force. Giving huge performance gains and cone controls.

DUAL VOICE COIL

Dual Voice Coil subs offer flexible wiring allowing you to have an easier time matching an amps output to the subwoofers RMS rating by raising or lowering impedance.

3" VOICE COIL

Large 3" Inch voice coil on the 12" and 15" subwoofers for increased power handling.
