Open Android head units

With open-source Android 9.0 operating system the two new models from Radical put app diversity into the dash. During the test, both R-D111 and R-D211 were confidently convincing. The capacitive Touchscreen reacts fluently, all functions run stable and with high quality. The operation of the common applications is

easy through the clear design of the user interface and safe also while driving. In the area of the head units with open Android operating system, Radical is convincing with price-worthy quality, reliability, high functionality and good usability.
